## EXPERIENCE

2020-  
Present

### UX Specialist & Visual Designer

Philips (Algotec)

- Leading the UX and UI design for innovative medical imaging solutions in the radiology field.
- Creation of a design system that allowed collaboration with the international team and improved the work process with other teams, such as developers.
- Delivering a better customer experience with every interaction while working with product managers, engineers, and researchers.
- Collaboration with global stakeholders across different time zones - Product Designers, Product Managers, Developers, and others.

2018-2019

### Product Designer

Cadence Design Systems

- Led the UX and UI (GUI) design process for a complex electronic components verification system.
- Translated complex feature specs to final UI/UX designs. I designed the flow and wireframes, and led creative brainstorming sessions for all possible use cases.
- Created and communicated a new visual language (design system) which improved the appearance and usability of the product.

2013-2018

### Graphic & UX/UI Designer

Avid Technology (Orad Hi-Tec Systems)

- Led the UX and UI (GUI) design process for the company's innovative technology and collaborative tools, used by world-leading broadcasters.
- Defined and implemented a new visual language for marketing materials, including social media, website, banners, exhibition booths, presentations, etc.

2012-2013

### Graphic Designer

Sasson Guetta Marketing Communication

- Established visual brands, created visual languages and designed marketing and advertising materials for technology and startup companies.

2010-2012

### Graphic Designer

Nimrod Manufacture

- Created the company's visual brand and designed marketing, advertising materials and website.
